To Whom It May Concern:

Skaha Residence and Day Care Centre, Solar Hot Water Heating Projects:

Many thanks to the Swiss Solar Tech (SST)/Pro Eco Energy (Pro Eco) team who completed the 25 solar panel heating system project for a 55 unit student residence apartment building at Okanagan College. In addition a secondary heating system was installed in our Day Care Centre building.

The first class installation was smooth with high quality workmanship and performance. We look forward to seeing the rewards of this system. SST/Pro Eco's dealing with all the government grants, permits and engineering was very professional so there was no time wasted on our part.

After the installation of the system, SST/Pro Eco continually checked the system on a regular basis to ensure it is operating as efficiently as possible. In house maintenance crew was provided with adequate training and Roger Huber was always available for any concerns. Through providing this knowledge and being available, we trust we will have no arising issues in the future.

I would recommend Roger Huber's team to anyone interested in alternative energy saving systems. For future work at Okanagan College Roger Huber will be considered due to his extensive knowledge and experience in designing solar heating systems. The projects were handled in a very professional manner.

If you have any questions or concerns, please don't hesitate to contact me at (250) 862-5625.

Yours truly,

Peter Csandl
Manager, Operations & Energy Systems
